

Rev House makes some of the best series-production motorised house boats in the world. They meet the highest standards for insulation, heating technology, resilience and durability. Rev House offers a 20-year guarantee on the house body and hull. While the hulls of other boats tend to be built from soft polyethylene, aluminum or impact-sensitive fibreglass, Rev House's 8 mm steel hull provides 100-percent resistance to ice and floes, allowing the boats to be used in the winter months.

The insulation and steel hull create a pleasant indoor climate on board. Underfloor heating keeps you warm and cozy in winter, and the living spaces have genuine wooden floors. For additional comfort you can customise your houseboat to include an open fireplace, sauna and hot tub. A biological sewage treatment system, solar panels, and drinking water purification system give you a large degree of independence from facilities on land.

The Rev House production site is in the north of Berlin. Once all the details and customer-specific requirements have been discussed, it takes around six to eight months to build a houseboat.

Penthouse living on the water, with a constantly changing backdrop and unobstructed views – a dream come true for design fans and anyone who yearns for a lifestyle of freedom and luxury.

Rev House facts and figures:

Measurements: 14.90 m² x 6.25 m²

Usable floor space: approx. 175 m²

Living area: 70 m²

Roof terrace: approx. 80 m²

Ground-floor terrace: approx. 25 m²

Combined terrace area: approx. 105 m²

Resilience: 8 mm steel hull

Guarantee: 20 years on house body and hull

Suitability for winter use: Top-quality insulation, underfloor heating, 2,000 liter oil tank

Self-sufficiency: Water purification system, sewage treatment system, electricity (generator and solar)

Individuality: Flexible floor plan

Extras: Sauna, hot tub, open fireplace, etc.

Construction period: 6-8 months

Possible uses: Residence/office in or near the city; alternative to conventional vacation properties

Advantages: Manoeuvrability, can be used permanently and all year round

Made in Germany: All talks with experts responsible for building the boat take place in Berlin; boatyard in northern Berlin
